ART/TREATMENT WITH SMILING RECEIPT

is a project realised within Erasmus+ programme and is financed from the European Union resources.

Art is a universal language. Every nation is able to understand each other via art regardless their mother tongue, religion or race. Each different branch may respond to a different need. To make the special need students smile is the top motivation resource of this project by transferring the project "Smile with art" into the real life.

We aim at comparing different practices of art therapy with our partners in European dimension and increasing the quality by creating added value with the exchange of good practices with our partner schools.

The exchange of good practices to be carried out in this project will satisfy our need to better integrate the artistic activities and school activities that make disadvantaged children smile and improve the intercultural competences of teachers and students.
